Re: Recommendation letter for the Journal of AIDS & Clinical Research to be indexed in PubMed

To Whom It May Concern:

Dear Sir/Madam,

I am writing to strongly recommend the Journal of AIDS & Clinical Research (JACR) to be indexed in PubMed Central. JACR is a multidisciplinary journal that aims to publish most complete and reliable source of information on the discoveries and current developments in HIV/AIDS related research.

I have been serving as an Editor for this Journal from its first published issue in 2010, and have seen the projectiles of the increasing number of high-quality manuscripts the Journal has received and the increasing number of citations on the papers that the Journal has published in the past years. As an epidemiologist with a decade of experiences on HIV/AIDS research and with experiences of serving as a reviewer for >15 journals including AIDS, JAMA, Plos One, I can vouch on the strictness of manuscript review by the Journal and the high quality of the papers that this Journal has published.

Journal staff and editorial board members have worked and will continue to work very hard for the journal to establish its high professional standing. The Index of the Journal by PubMed Central will make the high quality of papers in this Journal even more widely accessible to the global researchers.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Han-Zhu Qian'.

Han-Zhu Qian, M.D., Ph.D.
Assistant Professor of Medicine
Division of Epidemiology
Vanderbilt University Medical Center

Bethesda, MD U.S.A. 20894

To Whom It May Concern,

I am writing in support of the Journal of Autacoids for inclusion in PubMed Central's indexing system of medical journals. Although relatively young in years, the journal staff and the editorial board members of this online access journal have worked tirelessly to establish the journal's high professional standing by regularly releasing published articles that are on par or surpass articles in journals that PubMed Central currently indexes. I believe that indexing by the National Library of Medicine's PubMed Central would further enhance the quality and quantity of manuscripts submitted for publication to this journal. Therefore, I would strongly recommend that the Journal of Autacoids be indexed in the National Library of Medicine's PubMed Central.

Sincerely,

A handwritten signature in black ink, appearing to read "Henry E. Young", with a long horizontal line extending from the end of the signature.

To whom it may concern;

I am writing a recommendation letter for the Journal of Alcoholism & Drug Dependence to be indexed in PubMed. The Journal of Alcoholism & Drug Dependence publishes papers on psychological and sociological aspects of alcohol and drugs, and their effects, including biomedical, biochemical, pharmacological, physiological, behavioral actions and clinical research in humans. The journal includes a wide range of fields in its discipline to create a platform for the authors to make their contribution towards the journal and the editorial office promises a peer review process for the submitted manuscripts for the quality of publishing. The journal is an Open Access journal and aims to publish most complete and reliable source of information on the discoveries and current developments in the mode of original articles, review articles, case reports, short communications, etc. in all areas of the field and making them freely available through online without any restrictions or any other subscriptions to researchers worldwide. The journal is using Editorial Tracking System for quality in review process. Editorial Tracking is an online manuscript submission, review and tracking systems. Review processing is performed by the editorial board members of journal or outside experts; at least two independent reviewers approval followed by editor approval is required for acceptance of any citable manuscript.

I strongly recommend this journal to be indexed in PubMed.

Sincerely,

Takato Hiranita, Ph.D.

Dear Managing Office of National Library of Medicine:

Clinical Microbiology open access is a peer reviewed journal, dealing with interrelation of microorganisms under normal and pathological conditions and the dynamics of pathological process with an account of treatment till the clinical and complete recovery is presented. The editorial board members and journal staff have worked very hard for the journal to establish its high professional standing. Therefore, I would like to and recommend this journal to be indexed in Pub Med.

I appreciate your consideration.

Sincerely,

DEPARTMENT OF NEUROLOGY

UNIVERSITY OF MARYLAND
SCHOOL OF MEDICINE

July 22, 2013

To Whom it might be concerned,

With greatest pleasure I am writing this letter on behalf of Journal of Clinical & Cellular Immunology, who is applying to be indexed in PubMed Central. I have been a reviewer for this journal and a member of the Editorial Board for more then 4 years, during which time I reviewed and edited manuscripts and I was able to experience first hand the review process.

To introduce myself, I am a Professor of Neurology at the University of Maryland, School of Medicine. I have been a faculty member at University of Maryland for 19 years, and I am an expert in multiple sclerosis. During this time I was principal investigator of National Institutes of Health, Veterans Administration and Multiple Sclerosis Society funded research projects on multiple sclerosis. I was also an associate editor for Journal of Immunology and editorial board member for Journal of Neuroimmunology.

Based on my previous experience and that of working with the Journal of Clinical & Cellular Immunology I strongly recommend the Journal of Clinical & Cellular Immunology to be indexed in PubMed Central. I have to say that the Journal staff and editorial board members have worked very hard for the journal to establish its high professional standing.

I have absolutely no doubt that journal will continue on the same path and will become an important journal in the field of Immunology. I strongly recommend the journal as an excellent candidate to be indexed in PubMed.

Please do not hesitate to contact me if you need further information's.

Sincerely yours,

Horea Rus, M.D., PhD
Professor of Neurology

Letter of Consent

To
National Library of Medicine
Building 38A - Room 4N-419
8600 Rockville Pike
Bethesda, MD U.S.A. 20894

I hereby express my great interest in continued service in Journal of Bacteriology & Parasitology as an Editor. I further give my consent to disclose by the Journal my affiliation and contact information. I do not have any conflict of interest, which would interfere with this important service for science, medicine, and technology communities.

I strongly recommend this journal to be indexed in PubMed Central. Journal staff and editorial board members have worked very hard for the journal to establish its high professional standing.

RE: *Journal of Biometrics & Biostatistics*

Dear NLM:

Please accept this letter as reference of my support for the Journal of Biometrics & Biostatistics in their application for indexing in PubMed. The journal has published many articles of interest to scientists in both the United States and abroad.

Open-Source publishing represents an important venue for disseminating timely scientific information to the research community. I strongly endorse this movement and the above application for indexing.

Please do not hesitate to contact me if you need any additional information regarding this matter

Sincerely,
